

THE BOOK OF AFIYAH

Afiyah Institutional Operating System (AIOS)

Researched Governance, Technology, AI, Enterprise Architecture, Engineering and
Operations Blueprint

Founder Edition v0.2 | Working Manuscript

Built with Faith. Guided by Justice. Trusted with Tomorrow.

Document Control

Table DC-001 - Document Control Register

Field	Value
Document Title	The Book of Afiyah - Afiyah Institutional Operating System (AIOS) Blueprint
Document ID	AIOS-MASTER-RES-0.2
Classification	Founder Edition / Confidential Working Manuscript
Prepared For	Afiyah Infinity AI Ltd.
Prepared By	Chief Constitutional Architect / Founding CTO drafting function
Version	0.2 - Researched Assembly Draft
Date	2026-07-05
Review Status	Working draft. Requires legal, Shariah, security and board review before adoption.
Source Posture	Uses official and primary sources where available; implementation details require current counsel review.
Governing Motto	Built with Faith. Guided by Justice. Trusted with Tomorrow.

Legal and Shariah Review Notice

This manuscript is an institutional design and governance blueprint. It is not legal advice, a fatwa, financial advice, medical advice, or regulatory approval. Before adoption, Afiyah must obtain qualified UAE/DIFC legal counsel, Shariah Advisory Board review, information security review, AI governance review, and board approval.

Table of Contents

Right-click and update field in Microsoft Word to refresh the Table of Contents.

Executive Mandate

Afiyah shall be designed as a constitutional technology institution, not as a disconnected app. The institution's operating model is built around one discipline: every decision, system, product, AI model, data object, partner relationship and operational process must be traceable to the Constitution of Afiyah.

This researched assembly consolidates the institutional architecture requested by the Founder: board governance, Shariah governance, DIFC and UAE regulatory posture, AI governance, enterprise architecture, engineering, internal audit, risk management, and daily operations. It is structured as a working manuscript that can later be expanded into separate formal volumes, but is assembled here as one continuous governing blueprint.

Table EM-001 - Master Volume Map

Volume	Purpose	Primary Users
Volume I - Constitution & Philosophy	Mission, principles, covenant, Maqasid and institutional philosophy.	Founder, Board, Shariah Board, leadership, investors.
Volume II - Governance & Law	Board, Shariah, legal, AI, data, risk and assurance governance.	Board, CEO, Legal, Compliance, SAB, Risk.
Volume III - Technology & AI	Enterprise architecture, AI architecture, cloud, data, APIs and security.	CTO, CIO, CISO, AI, engineering.
Volume IV - Products & Engineering	Product specifications, journeys, backend, frontend, data models and acceptance standards.	Product, design, engineering, QA.
Volume V - Operations & Policies	HR, finance, procurement, support, incidents, BCP and SOPs.	COO, HR, Finance, Operations.
Volume VI - Research & Appendices	Qur'an, Hadith, Seerah, standards, legal references and bibliography.	Researchers, auditors, reviewers.

Source-Based Regulatory and Standards Anchor

The blueprint is anchored in a research posture using official sources where possible. DIFC's Regulation 10 page states that the updated Data Protection Regulations enacted on 1 September 2023 include Regulation 10 on processing personal data through autonomous and semi-autonomous systems, including AI, and frames the regulation as supporting interoperability around principles, ethics and governance. The DIFC Data Protection Law page identifies Law No. 5 of 2020 with enactment and commencement dates, and the UAE legislation portal identifies Federal Decree-Law No. 45 of 2021 on Personal Data Protection as active, issued 20 September 2021 and effective 2 January 2022. ISO describes ISO/IEC 42001:2023 as a management system standard for responsible development and use of AI systems, while ISO/IEC 27001:2022 is the best-known information security management system standard. NIST provides the AI Risk Management Framework as a risk-based reference for trustworthy AI.

Table SRC-001 - Research Source Map

Ref	Source	Application in Afiyah
SRC-DIFC-DPL	DIFC Data Protection Law No. 5 of 2020 legal database page.	Privacy governance, data protection, law tracking, local DIFC posture.
SRC-DIFC-R10	DIFC Regulation 10 page on autonomous and semi-	AI governance, personal-data processing through AI,

	autonomous systems.	interoperability posture.
SRC-UAE-PDPL	UAE Federal Decree-Law No. 45 of 2021 concerning Personal Data Protection.	UAE personal data protection baseline and data subject rights posture.
SRC-ISO-42001	ISO/IEC 42001:2023 AI management system.	AI management system, risk and opportunity governance, continuous improvement.
SRC-ISO-27001	ISO/IEC 27001:2022 information security management system.	Information security, risk-based controls, ISMS roadmap.
SRC-NIST-AI-RMF	NIST AI Risk Management Framework.	AI lifecycle risk functions: govern, map, measure, manage.
SRC-OECD-AI	OECD AI Principles.	Human-centred, trustworthy AI principles and public-policy alignment.
SRC-DUBAI-AI-SEAL	Dubai AI Seal official page.	Dubai AI ecosystem and external credibility pathway.

Part I - Constitutional Operating Model

Article COM-001 - Institutional Supremacy

Afiyah's technology, AI systems, policies and products must be governed by the Constitution. Software does not define policy. Policy defines software. Architecture does not define mission. Mission defines architecture. Where operational convenience conflicts with constitutional principle, the proposal must be redesigned, escalated or rejected.

Table COM-T01 - Constitutional Principle Matrix

Principle	Arabic	Institutional Meaning	Technology Meaning
Niyyah	النية	Every decision begins with sincere purpose.	Every feature has a documented purpose and harm assessment.
Afiyah	العافية	Holistic wellbeing and human flourishing.	Technology must improve wellbeing rather than addiction or anxiety.
Adl	العدل	Justice, fairness and due rights.	Accessible design, bias testing, fair pricing and equitable access.
Amanah	الأمانة	Trust, safekeeping and stewardship.	Privacy, security, consent, auditability and responsible data custody.
Deen	الدين	Faith as a way of life.	AI educates and references; it does not issue fatwa.
Ihsan	الإحسان	Excellence and beauty in execution.	High-quality engineering, design, testing and continuous improvement.
Barakah	البركة	Sustainable benefit beyond extraction.	Metrics reward lasting value, not addictive

			engagement.
Sadaqah	الصدقة	Giving without expectation.	Knowledge, opportunity and impact must circulate beyond the paying user.

Article COM-002 - Constitutional Traceability

Every artefact shall carry a unique identifier, owner, version, review date and constitutional mapping. This applies to policies, SOPs, architecture diagrams, APIs, database tables, AI agents, model cards, product specifications, research reports, board papers and incident records.

Table COM-T02 - Mandatory Artefact Metadata

Metadata Field	Requirement
Identifier	Stable ID using domain prefix, e.g., AIOS-AI-AGT-001.
Owner	Accountable person or role, not a generic team.
Custodian	Operational maintainer, typically technology or governance function.
Version	Semantic or controlled version number.
Classification	Public, Internal, Confidential, Restricted.
Constitutional Mapping	At least one constitutional principle.
Maqasid Mapping	Faith, life, intellect, lineage/family, wealth, dignity, as applicable.
Legal/Regulatory Mapping	Jurisdiction and requirement register reference.
Review Date	Defined by risk classification.
Change History	Why it changed and who approved it.

Part II - Governance & Law

Article GOV-001 - Board Governance

The Board governs the institution. Management executes. The Board shall protect the Constitution, approve strategy, set risk appetite, oversee executive leadership, approve material policies, review AI governance, ensure Shariah governance, and receive independent assurance. The Board shall not treat AI, privacy, cybersecurity, Shariah governance or data governance as technical afterthoughts. They are board-level trust matters.

Table GOV-T01 - Board Reserved Matters

Reserved Matter	Minimum Evidence
Constitutional amendments	Board resolution, change rationale, impact assessment.
Risk appetite statement	Approved risk taxonomy, thresholds, KRIs.
AI Governance Charter	AI risk classification, model registry, human oversight requirements.
Shariah Governance Charter	SAB terms, conflict rules, review procedures.
Data Protection Governance	DPO decision record, DPIA framework, privacy programme.
Cybersecurity Strategy	Security architecture, incident response plan, ISMS roadmap.
International expansion	Jurisdictional legal assessment and operating model

	review.
Regulated financial functionality	DFSA/legal perimeter assessment and partner licensing model.

Table GOV-T02 - Board Committee Architecture

Committee	Mandate	Core Inputs	Outputs
Audit & Risk Committee	Independent oversight of risk, control and assurance.	Risk register, audit findings, incidents, KRIs.	Audit plan, control remediation, board risk report.
Technology & AI Committee	Oversight of architecture, AI, cybersecurity, resilience.	Model registry, architecture decisions, security dashboards.	AI risk decisions, technical debt priorities, security escalations.
Shariah Advisory Board	Independent Shariah and Islamic ethical guidance.	Product submissions, content, partner structures.	Opinions, review memoranda, annual assurance statement.
Nomination & Remuneration Committee	Leadership, succession, culture and fair rewards.	People data, succession plans, performance design.	Appointments, compensation policy, leadership development.
Constitutional Review Council	Maintains constitutional alignment across volumes and decisions.	Policy changes, major product proposals, exceptions.	Constitutional review decisions and exceptions log.

Article GOV-002 - Shariah Governance

Afiyah shall establish Shariah governance as an independent assurance capability. The Shariah Advisory Board must not be treated as a marketing symbol. It is an institutional control over content, products, financial education, Islamic references and partner structures that require scholarly oversight. AI may assist with source retrieval and classification, but shall not replace scholarly judgement.

Table SHA-T01 - Shariah Governance Workflow

Step	Activity	Owner	Evidence
SHA-01	Submission of product/content/partner proposal.	Product Owner	Submission form and Statement of Niyyah.
SHA-02	Initial classification: no review, content review, product review, formal opinion.	Shariah Secretariat	Review classification record.
SHA-03	Evidence pack preparation: sources, user flow, risk, financial structure.	Product + Legal + Compliance	Evidence pack.
SHA-04	SAB review and questions.	SAB	Meeting minutes and queries.
SHA-05	Decision, conditions or rejection.	SAB	Opinion memo and conditions log.
SHA-06	Implementation verification.	Compliance + Product	Evidence of changes.
SHA-07	Annual re-review or trigger-based review.	SAB Secretariat	Re-review memo.

Article GOV-003 - DIFC and UAE Regulatory Expectations

Afiyah shall maintain a regulatory obligations register covering the jurisdictions in which it operates. DIFC, UAE federal law, DFSA perimeter considerations, data protection regimes, consumer protection, electronic transactions, cybersecurity and AI governance signals must be monitored continuously. The Constitution does not freeze a legal interpretation; it requires a current legal interpretation.

Table REG-T01 - Regulatory Mapping Control

Regulatory Area	Primary Concern	Afiyah Control
DIFC corporate and operating obligations	Entity governance, records, compliance and operating duties.	Corporate obligations register and company secretarial calendar.
DIFC data protection	Personal data processing in or from DIFC and data protection governance.	DPIA framework, data inventory, DPO assessment, privacy notices.
DIFC Regulation 10 / AI-personal data interface	Autonomous/semi-autonomous systems processing personal data.	AI system inventory, AI DPIA, human oversight, model monitoring.
UAE PDPL	Federal personal data protection requirements where applicable.	Lawful basis mapping, rights handling, data transfer review, retention.
DFSA perimeter	Financial services conducted in or from DIFC.	Regulated activity assessment before advice, execution, custody or investment functions.
Dubai AI ecosystem	Responsible AI credibility and ecosystem alignment.	Dubai AI Seal readiness assessment and AI governance evidence pack.

Article GOV-004 - AI Governance

AI is a governed institutional capability. Every AI system shall have a documented purpose, owner, risk classification, knowledge boundaries, memory rules, human oversight, evaluation metrics, incident response procedure and retirement pathway. AI systems serving faith, wellbeing, finance, health, law, family or vulnerable contexts require heightened review.

Table AI-T01 - AI Risk Classification

Class	Description	Examples	Required Controls
AI-0	No AI or deterministic automation.	Static reminders, fixed rules.	Normal change control.
AI-1	Low-risk assistance.	Navigation help, FAQ retrieval.	Prompt testing, logs, source control.
AI-2	Personalised educational support.	Learning companion, course recommendations.	Consent, RAG source controls, monitoring, evaluations.
AI-3	Sensitive wellbeing or financial capability support.	Journaling insights, budgeting education.	AI DPIA, human escalation, strict disclaimers, safety guardrails.
AI-4	High-impact or regulated-adjacent.	Financial recommendations, medical triage, legal	Not launched without legal/regulatory approval and licensed partner

		guidance.	model.
AI-X	Prohibited or deferred.	Fatwa issuance, diagnosis, investment advice, surveillance profiling.	Rejected unless future constitutional and legal framework changes.

Part III - Enterprise Architecture

Article EA-001 - Architecture Principle

Architecture exists to reduce institutional chaos. Afiyah shall operate as a composable digital institution: one constitution, one identity, one trust platform, one knowledge base, one design language, many products. Applications may change; capabilities endure.

Table EA-T01 - Enterprise Capability Map

Capability ID	Capability	Primary Owner	Constitutional Principles
CAP-01	Constitutional Governance	Board / Constitutional Office	Niyyah, Adl, Amanah, Ihsan
CAP-02	Shariah & Ethics	SAB Secretariat	Deen, Amanah, Adl
CAP-03	Identity & Trust	CIO / CISO	Amanah, Adl
CAP-04	Knowledge & Learning	Chief Learning Officer	Deen, Ihsan, Sadaqah
CAP-05	Financial Wellbeing	Product + Compliance	Adl, Amanah, Barakah
CAP-06	Wellbeing	Product + Clinical/Wellbeing Advisors	Afiyah, Amanah
CAP-07	Community	Community Operations	Adl, Afiyah, Amanah
CAP-08	Marketplace	Commercial / Compliance	Adl, Barakah, Sadaqah
CAP-09	Artificial Intelligence	Chief AI Officer	Niyyah, Amanah, Ihsan
CAP-10	Enterprise Operations	COO	Ihsan, Amanah
CAP-11	Risk & Resilience	CRO / CISO	Amanah, Adl
CAP-12	Innovation & Research	Strategy / Research Office	Niyyah, Ihsan, Barakah

Article EA-002 - Target Architecture Layers

Table EA-T02 - Target Architecture Layer Model

Layer	Description	Core Artefacts
Experience	Mobile app, web, partner portal, admin portal, scholar portal.	Journeys, screens, components, accessibility specifications.
Product Services	Learning, wellbeing, finance education, community, marketplace.	Service catalogue, domain services, APIs.
Trust Services	Identity, consent, privacy, audit, permissions, risk.	IAM, consent engine, audit ledger, policy engine.
AI Services	Orchestration, RAG, memory, agents, evaluation, guardrails.	Model registry, prompt registry, agent cards.
Data Platform	PostgreSQL, events, analytics, knowledge graph, vector search.	Data models, lineage, classifications.
Integration	API gateway, event bus, partner	API specs, contracts, schemas.

	integration, webhooks.	
Infrastructure	Cloud, Kubernetes/serverless, storage, secrets, observability.	IaC, runbooks, monitoring dashboards.

Part IV - Enterprise Data Architecture

Article EDA-001 - Data as Amanah

Data is an Amanah. No dataset shall exist without a lawful, constitutional and operational purpose. Applications do not own data. Domains own data. Engineering safeguards data. Users retain rights and choices according to applicable law and institutional policy.

Table EDA-T01 - Core Data Domain Model

Domain	Authoritative Entities	Restricted Data Considerations
Identity	Person, account, role, consent, preference, household, accessibility setting.	Identity, contact details, authentication factors, consent records.
Learning	Course, lesson, quiz, certificate, progress, reflection.	Learning analytics, assessment results.
Wellbeing	Habit, journal, mood, goal, sleep, cycle education preference.	Sensitive wellbeing and private reflections.
Financial Capability	Budget, saving goal, debt education record, zakat calculation, confidence score.	Financial information and behavioural inferences.
Community	Circle, post, moderation case, mentor relation, event.	Safety, abuse reports, private group content.
Marketplace	Merchant, product, order, payout, due diligence file.	Commercial records and partner verification.
AI	Conversation, context, memory, recommendation, feedback, evaluation.	AI memory, prompts, personal context and inferences.
Governance	Policy, control, risk, audit finding, board paper, SAB memo.	Confidential governance and legal records.

Table EDA-T02 - Data Classification Standard

Class	Definition	Examples	Minimum Controls
Public	Approved for external publication.	Website copy, published reports.	Approval workflow, version record.
Internal	Operational information not public.	Team SOPs, non-sensitive meeting notes.	Authenticated access, internal distribution.
Confidential	Disclosure may harm Afiyah or users.	Contracts, roadmaps, financials, partner files.	RBAC, encryption, audit logs.
Restricted	Highest sensitivity.	Journal entries, AI memory, authentication, legal cases, wellbeing records.	Least privilege, encryption, heightened audit, retention review.

Part V - AI Architecture

Article AIA-001 - AI Constitutional Boundary

Afiyah AI shall operate as a governed companion and learning guide first. It shall not issue fatwa, medical diagnosis, investment advice, legal representation, or regulated financial advice. It may educate, explain, retrieve sources, structure learning, support reflection, recommend seeking qualified professionals, and escalate high-risk cases.

Table AIA-T01 - AI Agent Registry v0.1

Agent ID	Agent Name	Purpose	Risk Class	Memory
AI-AGT-001	Afiyah Companion	Gentle wellbeing and learning orientation.	AI-2/AI-3 depending on input	User-controlled short/long memory.
AI-AGT-002	Learning Guide	Pathway guidance across 10 learning modules.	AI-2	Learning history only.
AI-AGT-003	Financial Literacy Guide	Islamic finance and banking fundamentals education.	AI-3	Financial education progress, no advice memory without consent.
AI-AGT-004	Wellbeing Reflection Guide	Journaling prompts, habit reflection and non-clinical support.	AI-3	Highly restricted wellbeing memory.
AI-AGT-005	Research Assistant	Internal research, citations, source management.	AI-2	Institutional memory only.
AI-AGT-006	Operations Assistant	Admin workflow support for internal teams.	AI-2	Role-based operational memory.

Table AIA-T02 - AI Lifecycle Controls

Lifecycle Stage	Controls	Evidence
Idea	Statement of Niyyah, risk classification, data needs.	AI proposal record.
Design	Agent card, system prompt, knowledge sources, memory rules.	Design pack.
Build	Secure development, prompt versioning, test dataset.	Repository and model/prompt registry.
Evaluate	Accuracy, safety, hallucination, bias, refusal, escalation tests.	Evaluation report.
Approve	Constitutional, product, security, legal and Shariah review if needed.	Approval record.
Deploy	Monitoring, logging, rollback plan, incident contact.	Release record.
Monitor	Drift, complaints, safety events, source freshness.	AI dashboard.
Retire	Disable, archive, migrate, notify	Retirement record.

	where needed.	
--	---------------	--

Part VI - Cloud and Infrastructure Architecture

Article CIA-001 - Cloud Architecture Principle

Cloud infrastructure shall be designed for resilience, data protection, cost discipline, observability and jurisdictional review. Afiyah may begin with managed cloud services for speed, but every managed service must be documented, monitored and exit-planned. Vendor dependency shall be governed as a risk.

Table CIA-T01 - Reference Cloud Components

Component	Preferred Capability	Controls
Compute	Containerized services and managed serverless where appropriate.	IaC, autoscaling, patching, logging.
Database	PostgreSQL for transactional data.	Backups, encryption, RLS where applicable, migrations.
Cache/Queue	Redis and managed queues/event bus.	TTL, access control, monitoring.
Object Storage	Media, documents, exports.	Encryption, signed URLs, retention.
Vector Search	AI retrieval and semantic memory.	Source lineage, access filtering, freshness.
Secrets	Central secrets manager.	Rotation, least privilege, no secrets in code.
Observability	Logs, metrics, traces, alerts.	Dashboards, SLOs, incident response.

Part VII - Engineering Standards

Article ENG-001 - Engineering Constitution

Engineering is institutional stewardship. Code must be readable, tested, secure, documented and maintainable. Every repository shall include ownership, architecture notes, threat model, setup instructions, coding standards, CI/CD pipeline, dependency management, release procedure and incident runbook.

Table ENG-T01 - Engineering Standard Index

Standard ID	Standard	Mandatory Evidence
ENG-STD-001	Repository Standard	README, owners, setup, env vars, architecture.
ENG-STD-002	Coding Standard	Linting, formatting, naming conventions, review rules.
ENG-STD-003	Testing Standard	Unit, integration, contract, e2e, security tests.
ENG-STD-004	API Standard	OpenAPI spec, versioning, auth, errors, rate limits.
ENG-STD-005	Database Standard	Migrations, schema docs, indexes, retention flags.

ENG-STD-006	Release Standard	CI/CD, approvals, rollback, change log.
ENG-STD-007	Incident Standard	Severity, owner, timeline, RCA, lessons.
ENG-STD-008	AI Engineering Standard	Prompt registry, evals, model cards, monitoring.

Article ENG-002 - Proposed Stack

Table ENG-T02 - Technology Stack Baseline

Layer	Recommended Baseline	Reason
Mobile	Flutter or React Native; final decision by team capability.	Single codebase for iOS/Android; strong design consistency.
Web App	Next.js / React / TypeScript.	Modern web, SEO, app router, component ecosystem.
Backend	NestJS / TypeScript for core services.	Typed modular architecture, enterprise maintainability.
AI Services	Python services for AI orchestration and evaluation.	AI tooling ecosystem and model evaluation flexibility.
Database	PostgreSQL primary; Redis cache; object storage; vector store.	Reliable relational backbone with AI retrieval capability.
Infrastructure	Managed cloud first; containerization as complexity grows.	Speed now, portability later.
Auth	OIDC/OAuth2.1 compatible identity provider.	Standards-based security.
Analytics	Privacy-aware product analytics and BI warehouse.	Impact measurement without surveillance model.

Part VIII - Product Architecture

Article PROD-001 - Product Operating Model

Afiyah shall not ship features without constitutional purpose, product outcome, risk assessment, data mapping, AI mapping, security review, analytics plan and support procedure. Products are grouped into domains: Companion, Learning, Wellbeing, Financial Capability, Community, Marketplace, Partner Portal, Scholar Portal, Admin Console and Governance Console.

Table PROD-T01 - Product Domain Specification Index

Product	Core Outcomes	High-Risk Considerations
Afiyah Companion	Daily guidance, reflection, learning pathway, wellbeing prompt.	AI dependency, mental wellbeing boundaries, privacy.
Learning System	10 modules, assessments, progress, certificates.	Content accuracy, Shariah review, partner certificates.
Infinity Score	Private progress reflection across dimensions.	Misinterpretation, anxiety, ranking risk.
Financial Capability	Budgeting, education, zakat calculation, Islamic finance fundamentals.	Regulated advice boundary, financial data sensitivity.

Sister Circles	Community, mentorship, events, safe support.	Moderation, harassment, anonymity, abuse reporting.
Marketplace	Women-led products/services and partner offerings.	Due diligence, consumer protection, payments, disputes.
Admin Console	Support, risk, content, operations.	Privileged access, auditability.
Scholar Portal	Review workflow, source management, opinion records.	Independence, conflicts, version control.

Part IX - Operations and SOPs

Article OPS-001 - Operating Discipline

Daily operations shall implement constitutional principles through repeatable procedures. Every SOP shall define purpose, scope, owner, triggers, inputs, steps, outputs, controls, escalation, evidence and review cycle. SOPs shall be version-controlled and auditable.

Table OPS-T01 - SOP Library Index

SOP ID	SOP Name	Owner
OPS-SOP-001	Constitutional Review SOP	Constitutional Office
OPS-SOP-002	Product Approval SOP	Product
OPS-SOP-003	Shariah Review SOP	SAB Secretariat
OPS-SOP-004	AI Release SOP	Chief AI Officer
OPS-SOP-005	Security Incident SOP	CISO
OPS-SOP-006	Privacy Rights Request SOP	Data Protection Lead
OPS-SOP-007	Vendor Due Diligence SOP	Procurement / Risk
OPS-SOP-008	Community Safety Escalation SOP	Community Ops
OPS-SOP-009	Content Publishing SOP	Learning / Content
OPS-SOP-010	Business Continuity Activation SOP	COO / CRO

Part X - Risk, Internal Audit and Assurance

Article RISK-001 - Enterprise Risk Taxonomy

Table RISK-T01 - Enterprise Risk Register v0.1

Risk ID	Risk	Impact	Core Mitigation
R-001	Regulated financial activity boundary crossed unintentionally.	Regulatory enforcement, reputational harm.	Legal perimeter review, licensed partner model, product gating.
R-002	AI hallucination in faith, finance or wellbeing context.	User harm, loss of trust.	RAG constraints, disclaimers, escalation, evaluations.
R-003	Privacy breach involving sensitive reflections or identity data.	High user harm, legal exposure.	Encryption, least privilege, DLP, incident response.
R-004	Shariah inconsistency in content or product claims.	Trust and legitimacy harm.	SAB review workflow, source versioning.

R-005	Community safety failure.	User harm and reputational damage.	Moderation, reporting, anonymity options, escalation.
R-006	Technical debt reduces resilience.	Outages, high costs, security gaps.	Architecture review, debt register, SLOs.
R-007	Vendor lock-in or vendor non-compliance.	Operational and regulatory risk.	Vendor due diligence, exit plan, DPAs.
R-008	Mission drift under investor pressure.	Constitutional harm.	Board reserved matters, constitutional review, impact KPIs.

Article AUD-001 - Internal Audit Model

Internal audit shall provide independent assurance that governance, risk management and controls operate as intended. Audit plans shall include privacy, cybersecurity, AI governance, Shariah review process, financial controls, vendor governance, product governance and constitutional traceability. Findings shall be assigned, tracked and verified before closure.

Table AUD-T01 - Audit Evidence Catalogue

Area	Evidence
Board Governance	Minutes, reserved matters approvals, committee reports.
AI Governance	Model registry, agent cards, evaluation reports, incident logs.
Privacy	DPIAs, consent records, rights request logs, retention records.
Security	Vulnerability scans, access reviews, incident reports, backups.
Shariah Governance	SAB submissions, opinions, conditions and re-review logs.
Engineering	PR reviews, CI/CD logs, test reports, ADRs, release notes.
Operations	SOP logs, training records, vendor assessments.

Part XI - Implementation Roadmap

Table ROAD-T01 - Phased Implementation Roadmap

Phase	Timeline	Institutional Outcome	Deliverables
Phase 0	0-90 days	Constitution and architecture foundation.	Board charter draft, SAB charter, risk taxonomy, tech architecture, MVP PRD.
Phase 1	3-9 months	MVP companion and learning system.	Identity, consent, learning, AI companion, admin console, analytics baseline.
Phase 2	9-18 months	Trust platform and community.	Sister Circles, moderation, privacy rights workflow, AI

			evaluations, partner onboarding.
Phase 3	18-30 months	Financial capability and marketplace.	Budgeting education, zakat tools, merchant onboarding, due diligence controls.
Phase 4	30-48 months	Scale and governance maturity.	Internal audit, AI management system, ISMS roadmap, multi-country compliance.
Phase 5	48+ months	Institutional platform.	Partner APIs, scholar portal, research institute, impact reporting, advanced AI council.

Appendix A - Islamic Source Anchors

Table APP-A01 - Qur'anic and Prophetic Source Anchors

Theme	Source Anchor	Afiyah Governance Use
Justice and Excellence	Qur'an 16:90	Adl and Ihsan as board and product standards.
Trusts and Justice	Qur'an 4:58	Amanah, data stewardship, governance and leadership.
Fulfil Covenants	Qur'an 17:34	Contracts, policies, promises and partner obligations.
Justice Despite Conflict	Qur'an 5:8	Fairness in audit, moderation, complaints and employment.
Cooperation in Good	Qur'an 5:2	Partnership principles and ecosystem strategy.
Intentions	Hadith: actions judged by intentions	Statement of Niyyah for every major initiative.
No Harm	Hadith: no harm and no reciprocating harm	Product safety, AI safety and risk mitigation.
Truthful Trade	Hadith on truthful and trustworthy merchant	Marketplace ethics and commercial disclosure.

Appendix B - Reference Bibliography

Table APP-B01 - Bibliography and Standards Register

Ref	Source
DIFC-DPL-2020	Dubai International Financial Centre, Data Protection Law DIFC Law No. 5 of 2020 legal database page.
DIFC-REG-10	DIFC Commissioner of Data Protection, Regulation 10 page on autonomous and semi-autonomous systems.
UAE-PDPL-2021	United Arab Emirates Legislation Portal, Federal Decree-Law No. 45 of 2021 concerning Personal Data Protection.

ISO-42001-2023	ISO/IEC 42001:2023, Information technology - Artificial intelligence - Management system.
ISO-27001-2022	ISO/IEC 27001:2022, Information security, cybersecurity and privacy protection - ISMS requirements.
NIST-AI-RMF	National Institute of Standards and Technology, AI Risk Management Framework.
OECD-AI	OECD AI Principles.
DUBAI-AI-SEAL	Dubai Centre for Artificial Intelligence, Dubai AI Seal.
AAOIFI	AAOIFI Shariah standards and governance references, for later SAB adoption where relevant.
IFSB	Islamic Financial Services Board governance and Shariah governance guidance, for later regulated/partner financial context.

Appendix C - Controlled Vocabulary

Table APP-C01 - Afiyah Language Standard

Do Not Say	Say Instead	Reason
Users are captured	Members are welcomed	Human dignity over extraction.
Attention is monetised	Attention is honoured	Attention is an Amanah.
Engagement at all costs	Beneficial engagement	Wellbeing over addiction.
AI decides	AI assists	Human accountability remains.
Data is an asset	Data is a trust	Amanah and privacy posture.
Fatwa chatbot	Shariah-reviewed educational guidance	AI cannot replace scholars.
Financial advice	Financial education / licensed partner service	Regulatory boundary discipline.
